- **Bajaj Auto Ltd- BUY- Automobiles | Company Update- Broad based growth; Valuation Attractive:**

Key Points

- **Volumes to bottom out in FY25:** We expect overall volumes to recover from FY26 owing to all round recovery in the domestic market for 2Ws including E2Ws, CNG, premium motorcycles and also 3Ws. We build in volume growth of 9%./6% CAGR for domestic 2Ws/3Ws over FY24-27. We expect CNG volumes to clock ~600k units in FY27.
- **Pole position in EVs:** With 25% market share, Bajaj Chetak secured poll position in the month of December'24. We believe the company will consolidate its pole position on the back of the recently launched Chetak 35 series which has better features and a new platform. Going ahead, the company plans to launch a host of new products in both 2W and 3W categories. The company also plans to launch E-3Ws under a separate new brand. Furthermore, the new platform which lowers the cost of EVs and growing scale of operations will support margins.
- **Demand shifting to 125cc+ segment:** The 2W industry, largely the 125cc segment, is growing faster, from 42% contribution to 55% over the past 3 years signalling a shift in consumer behaviour. The company has 25% market share in the category.
- **Exports showing steady recovery:** Bajaj Auto continues to see a strong trajectory in export markets like Mexico and LATAM where it is developing a new base. The company has also started a CKD unit in Brazil. Though Africa continues to decline albeit at a slower pace than before, we believe it's just a matter of a few quarters before it starts showing recovery. For 3Ws also exports have started recovering. Moreover, Quadricycle Quite has replaced 3Ws in markets like Egypt which banned 3W imports a few years back.
- **Valuation:** Currently the stock is trading at a core PE of 23x at FY27 numbers which we believe is providing a good entry point given the favourable risk reward. We thus upgrade the stock to BUY from SELL valuing it at SOTP with core business valued at 28x core EPS and cash of Rs827/share to arrive at a TP of Rs 10,613. We build in the Revenue/EBITDA growth of 14%/16% CAGR over FY24-27.

Triumph growing strength to strength in the export market: Bajaj Auto continues to see a strong response to Triumph particularly in export market with YTD sales till Nov of 24k units. It has been received well in the markets like EU US and North America. In domestic market too Triumph has been able to maintain market share. With new model launches and expanding footprint we believe volumes will further pick up going ahead. Currently in the domestic market, it is available across ~170 touchpoints which is set to further increase to ~200 touchpoints.

Green portfolio underscores transformation: Electric & CNG across 2W & 3W comprise ~40% of domestic sales. Mileage conscious customers have received the Freedom 125 well as the running cost of CNG is 50% lower than Petrol. The company is increasing capacity to 30k units/month in 3Q and subsequently to 40k units in 4Q of this fiscal. The transformation has been supported by the gas distribution companies as well because the customer base for this drivetrain/multi-fuel technology is vast.

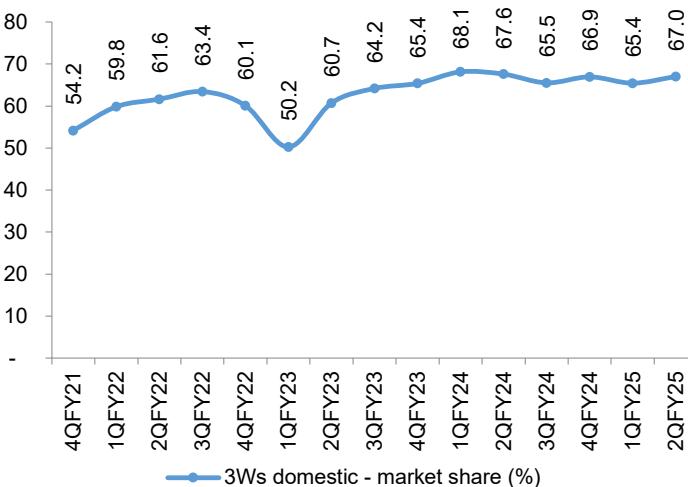

Exports coming back but still below peak: Africa continues to be under pressure, especially Nigeria where Bajaj Auto used to sell an average of 50k units/month; this has reduced to the current run-rate of ~20k/month. The company, however is compensating the slowdown in Africa by increasing its footprint in markets like the middle east where it saw ~20% growth YoY and LatAm which grew by ~24% YoY. The company has also started a CKD plant in Brazil with a capacity of 20k units per annum which can be scaled up to 50k units per annum. The company has also commenced exports of Qute to Egypt. Going ahead, exports are expected to improve gradually. Going ahead we believe the recovery in Africa market along with the traction in new markets will lead to significant volume growth in exports.
